# CARD PERSONALIZATION SOLUTIONS

# ASURE ID<sup>®</sup> 7 IS HERE.

- C Friendly and intuitive interface Enhanced user experience makes photo ID card design and data entry a breeze.
- Choose Your Source Easily print cards from records stored in Asure ID's internal database, or with Live Link<sup>™</sup>, directly from your local Microsoft<sup>™</sup> database. Asure ID Express can use ID photos in any local folder, linked by an administrator.
- C Auto-Update You're always up-to-date with automatic notifications of free software updates to ensure that the software is never outdated, only available with Asure ID.

### Productivity has never looked better.

Asure ID offers much more than good looks, it provides a dramatic speed boost. Everything you need to design and populate a card is right in front of you in a crisp, clean environment that allows the user to glide from data entry to card design to printing and reporting.

### Everyday work made effortless.

Routine tasks can be performed with a couple of mouse clicks. It's a snap to capture or load a photo, void a card or set the print counter. And you can populate card data fields directly from the internal Microsoft Access™ database. These and other frequentlyused features are within easy reach on the Microsoft® "Ribbon"-inspired toolbar.

#### Asure ID "remembers".

At startup, Asure ID initiates automatic loading of the last template and report used, letting you pick up exactly where you left off.

#### Find it fast!

When time counts, the optional Quick Filter allows a wildcard search on any field in the database. Global Find extends this convenience across all databases and templates linked and managed with Asure ID.

#### Additional features:

Express packs additional features like compound data fields, batch printing, conditional design and print rules, and password protection. When your needs grow, simply upgrade to Asure ID Enterprise or Exchange versions to add features and functionality.

### Simply intuitive.

For all its power and convenience, the most surprising part of Asure ID is its intuitive nature. Tools and processes have been so carefully designed that it seems to anticipate what you need next.

Asure ID takes ID card personalization to the next level by making users more productive. Ask your HID Global dealer. Or visit: hidglobal.com/idsoftware

#### Tools at your fingertips

- Multi-task with tabbed navigation, and effortlessly switch between card design and data entry, managing each independently
- C The toolbar puts frequently used elements into logical order
- C De-clutter the workspace by hiding colors and attributes until they're needed, using pop-out control palettes
- What You See Is What You Get" display helps ensure accurate card design by showing exactly how a card will print, including data placeholders.

<sup>1</sup>Manage and control card access formats, smart cards and card applications.

<sup>2</sup> Storage limitations based on MS Access. <sup>3</sup> Bi-Directional data exchange with third party databases and applications.

<sup>4</sup> Available as a purchasable add-on option.

# ASURE ID® MEETS THE CARD APPLICATION NEEDS OF:

- Small to Medium Businesses
- State & Local Government
- Transportation
- Health Care
- Universities
- Corrections
- Sports & Leisure
- Health Clubs
- **Retail & Loyalty**
- Casinos
- Manufacturing Plants
- Libraries

### HID GLOBAL IS THE LEADER IN SOLUTIONS FOR THE DELIVERY OF SECURE IDENTITY.

Asure ID is just one part of a complete, integrated system for the issuance, management and authentication of secure IDs. Your HID Global dealer can custom design a secure identity system using proven HID components including:

- FARGO<sup>®</sup> ID Card Printer/Encoders
- Cards, ribbons, films and overlaminates
- Digital cameras and photo accessories
- ID card holders, lanyards and clips
- ID card production services
- HID contact and contactless card readers, including iCLASS<sup>®</sup> smart card readers

The suggested minimal system requirements for Asure ID 7 are:

- 1 gigahertz (GHz) or faster processor
- 1 gigabyte (GB) RAM
- 1 GB available hard disk space
