ID CARD SOFTWARE

CREATE AND ISSUE ID CARDS FOR ANY ORGANIZATION

RAPIDCARD IDMS

RAPIDCARD PRO

Whether your need is a simple photo ID, or a complex multifunctional card with visual and non-visual security features built-in, our card production systems can easily get the job done from start to finish. Our products and systems are designed for speed, efficiency, user flexiblity, and regardless of what combination of our software and hardware are used, the guaranteed final product is a professional and secure high quality ID card and credential.

fast & easy ID carding
powerful printing options

CONTACTLESS CARDING

In addition to issuing cards with barcodes or magnetic stripes, you can now utilize contactless card encoding. HID iCLASS, HID Prox and Mifare support options are available with certain popular models of printers.

QUICK CARD PRINTING

RapIDcard can easily integrate with most ID card printer brands. Polaroid, Evolis, Fargo, DNP, Datacard and more.
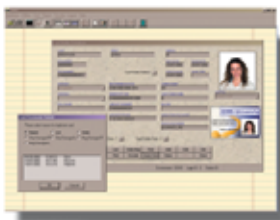

SUPPORT

Multiple support contract options are available with Vision Database Systems. Be sure that your systems are always up and running smoothly.

RAPIDCARD PRO

RapIDcard PRO provides all of the basic features required to get your ID cards printed on high quality plastic cards. You can use custom backgrounds and design fields for your cardholder information and photos. Set up digital photo capture, auto-printing or signature capture for your cards. Multiple security levels can be set and the system will easily integrate to many other systems such as HR, Student, Library, Access Control, etc., and offers numerous ways to do so.

RAPIDCARD IDMS

RapIDcard IDMS includes all of the features of RapIDcard PRO. In addition it provides a number of added features for advanced users. IDMS includes an ID/ISO/LIB number module as well as both real-time and non-real-time database upload/download syncing interfaces to Blackboard, CBORD, and many other access control systems. It use a MOD-10 Check Digit algorithm to generate custom ID, ISO and library numbers, as well as other advanced features.

FEATURES

- ODBC COMPLIANT
- DIGITAL PHOTO CAPTURE
- AUTO ASSIGN CARD DESIGNS
- BATCH PRINTING
- SIGNATURE CAPTURE
- SUPPORTS MOST PRINTER BRANDS
- CUSTOMIZE SCREEN LOOK
- AUDIT LOG OF ALL ACTIVITIES

SMARTTECH ID
Total Access & Identity Solutions

RAPIDCARD FEATURES

- ODBC Compliant: supports multiple database engines-user choice
- Automatically pull cardholder data from primary and secondary sources
- Digital photo capture utilizing a digital camera
- Unlimited card designs with photo ghosting, horizontal/vertical text, rotate 180, all fonts, all colors
- Auto assign card design based upon specific field data in cardholder record
- Customized screen look and over 45 user defined fields
- Auto-printing (after taking photo)
- Signature capture
- Supports most printer brands
- Batch printing
- Multi-level security/password protection
- Custom magnetic stripe encoding and/or ABA format-all tracks
- Customized barcode design and printing
- Multi-printer support (different card types for multiple printers/hoppers)
- Optional smart card issuance and encoding
- 2-D encrypted barcode capability to store photo, signature, text
- Right click on photo to save in a different location
- Audit log of ALL activities performed in ID system from user logon to all record activities
- Easily integrates to many other systems such as HR, Student, Library, Access Control, etc., and offers numerous ways to do so
- Pull information or cardholder data from a secondary source if "record not found"
- Cloning feature for manual entry: user defined fields of commonly replicated data
- Save four photo feature: user defined to save photo four ways/sizes to multiple directories with one click

IDMS FEATURES IN ADDITION TO STANDARD RAPIDCARD PRO FEATURES

- ID/ISO/LIB Number Module - Provides actual credit card encoding
- Smoothly handles credit card number generation without duplicates
- Both real-time and non-real-time database upload/download syncing interfaces to Blackboard, CBORD, and many other access control transaction, food, library, and other campus systems.
- Uses a MOD-10 Check Digit algorithm to generate custom ID, ISO and library numbers
- Can auto generate ID number or any number to assign to a cardholder record (user defined)
- User defined start/stop ranges
- Built in logic to handle card re-issues with display and listing of all previous numbers used for a specific cardholder
- User defined reprint reasons for card re-issuance with cardholder history displayed upon reprint
- Card Number (ISO, LIB) tracking

Import/Export Utility Module:

- Customized import/export designs to manage flows of data to and from IDMS to other systems
- Can be automated
- Full updates and/or changes only (user defined)
- Use as conversion utility

RAPIDCARD IDMS & PRO SYSTEM SPECIFICATIONS

- 32 Bit ODBC compliant for Microsoft Windows 2000/XP /Vista
- Current Supported Database Installations: MS-SQL Server, Oracle v7i-v9i, Sybase, MS-Access, DB2, dBASE
- PC/Laptop Specifications are those of minimum Windows requirements for operating system as well as any specifics for camera, printer, or add-on peripheral to be used with system
